

BASIC TRAINING COURSE

HÜBNER Training – Maintenance Recommendations

COURSE DURATION:

3 hours / vehicle type (brand, model, year)

TRAINING CONTENTS:

- Structure of the articulation system, folding bellows and energy guidance system
- Identification of HÜBNER components
- Maintenance recommendations for the articulation system and the folding bellows
- Criteria for assessing the condition of components
- Presentation of special HÜBNER repair tools for the HÜBNER system

TRAINING GOAL:

The HÜBNER training course **Maintenance Recommendations** is specifically adapted to your bus fleet and gangway system. Proper maintenance and care extend the service life of the gangway system. The course includes a customized training unit that enables you to subsequently carry out minor maintenance tasks independently (e.g. replacement of sliding elements, repairs to the folding bellows, etc.).

For more advanced and complex maintenance and repair work, we offer our **HÜBNER Premium Training Course**. This course provides an extensive and detailed insight into the gangway system with both theoretical and practical units. The course imparts detailed technical knowledge and upon completion makes it possible for participants to carry out common repairs.

TRAINING LOCATION:

Practice-oriented training on the gangway system of your vehicle at your own location.

NUMBER OF PARTICIPANTS:

Up to 8 persons (further participants on request)

OUR SERVICE FOR YOU:

- Specialized and experienced training personnel
- Hand-out material for study and reference
