

Worldwide Expertise in Transport Technology.

As a comprehensive system supplier, the HÜBNER Group manufactures key components for the transportation industry (for rail vehicles, buses, airport technology, automobiles and trucks) as well as medical technology products. The range of products and services includes the design and production of folding bellows, vehicle articulation systems, flexible gangway systems, window systems, PUR molded foam components as well as products made of rubber and injection molded plastic.

With its international structure, the HÜBNER Group maintains close and creative contact with the market. Thinking globally and acting locally for the benefit of our customers, we are continually expanding into new countries and new markets. There, together with our customers, we produce individual solutions and innovative product developments with the highest level of technical precision. Worldwide more than 1,700 highly qualified employees serve the HÜBNER GmbH and form the driving force for our quality, efficiency and growth.
