

# Folding bellows

## Customised and flexible

HÜBNER has been manufacturing folding bellows for articulated vehicles for more than 50 years. Folding bellows for articulated buses and trams as well as for local and intercity trains are produced in all imaginable sizes and for the most diverse applications. Our experience in design and material selection has made us a competent partner and market leader for all sectors of the industry.

For every type of vehicle a folding-bellow solution is developed that is customised to suit the vehicle design in terms of colour and styling. The folding bellows are normally made out of specially coated fabric.

A number of alternative interiors - such as various handrail models or platform seating - complement HÜBNER's range for the design of folding bellows for articulated vehicles.

- Folding bellows made of specially coated fabric with aluminium frames
- Customized folding bellows (colored or translucent)
- Coverings
- Interior design for articulated buses
- Folding bellows for monorails and multi-joint vehicles
