

terrasensa® relief floor panels

terrasensa® is the latest innovation for therapy and fitness from the HUBNER company. The floor panels made of 100% polyurethane with a patented surface relief system offer ideal support for training sensorimotor skills, developing muscle strength and improving the sense of balance.

terrasensa® - for training and development

The ingenious surface relief system perfectly recreates actual forms found in nature. terrasensa® prevents the development of routinized forms of movement and thus promotes the development of the body's sense of balance in every movement of the user. Each unevenness of the surface is so exactly calculated that with just four terrasensa® panels countless surface combinations are created on a single square meter. With each additional floor panel the possibilities are multiplied many times over. The anti-slide system on the bottom surface ensures a safe and secure positioning.

Physicians and physical therapists recommend terrasensa® for rehabilitation and ergotherapy, as well as for orthopedic, neurological, pediatric and geriatric applications. For athletes, terrasensa® improves performance as a demanding basis for training and minimizes the risk of injury. Seniors gain greater self confidence when training with the floor panels developing more secure forms of movement and a more stable gait. Exciting possibilities open up to children as they refine their natural movement intelligence and experience new motion perceptions in playful interaction with the surfaces.

Hightech for health

terrasensa® combines the best characteristics of the material polyurethane:

- extremely wear resistant
- no loss of form or function even with heavy use
- comfortably shock absorbing
- not sensitive to cleaning agents or to moisture
- dermatologically safe
- environmentally friendly production process

Product details

Dimensions: approx. 50 x 50 cm

Weight: approx. 3,2 kg

Material: 100 % polyurethane

Degree of hardness: approx.

45 Shore A

Development and design: Jens Freitag with team, [TEO Industriedesign](#)
